THREATADVICE vCISO

Data Security Is Your Business's Biggest Threat & The One That Is The Hardest To Manage

The threat landscape has evolved significantly. Cybersecurity is one of the most prevalent concerns facing all businesses today and proper measures and protection are vital to ensure that your business does not suffer. Unfortunately many small to mid-sized businesses can't afford to attract and retain the talent needed to ensure comprehensive oversight in these areas.

ThreatAdvice vCISO Reduces Your Security Burden

Rest easy with ThreatAdvice vCISO with the assurance that you have an overarching solution to oversee all of your data security needs. ThreatAdvice vCISO provides oversight into all of your cybersecurity needs. Details of what is included in ThreatAdvice vCISO are below. If this doesn't fit with your needs, talk to a sales representative about creating a customized package!

Proprietary vCISO Dashboard

Single pane of glass where you can find the current status of your company's cybersecurity and compliance program.

Q&A Ticketing with vCISO Team

Team of information security experts available 24/7.

Monthly Meeting with vCISO Professional

Review your comprehensive security posture with our information security expert.

Annual Security Risk Assessment

TA vCISO provides you with the tools to help track and complete your annual Security Risk Assessment: HIPAA, NIST, FFIEC

Board and C-Suite Reporting

All of your board and C-Suite cybersecurity reporting made simple.

“Having a chief information security officer is more important than ever... and more expensive. The ThreatAdvice Virtual CISO product is a wonderful solution for many organizations.”

Frank W. Abagnale

Frank Abagnale,
former *Catch Me If You Can* con-artist
turned 40+ year FBI consultant

Cybersecurity oversight now comes with a **\$500,000** guarantee.

THREATADVICE vCISO Limited Warranty

Peace of Mind That You Are Protected. As a vCISO Client, Your Warranty Covers...

Network Security – financial damages that a 3rd party suffers because a client fails to prevent unauthorized access to computer systems, loss of PII, transmission of a computer virus or a denial of service attack.

Privacy - financial damages that a 3rd party suffers because a client fails to prevent the theft of PII, complying with a privacy policy or complying with data breach laws.

Privacy Notification Costs – notification costs required by data breach laws or voluntary in nature and PR expenses arising from failing to protect PII.

Confidential Information Extortion – extortion investigation and demand costs arising from a threat to access the network or disclose PII.

Confidential Information Recovery – costs to restore or recover or recollect data due to unauthorized access to computer systems, loss of PII, transmission of a computer virus or a denial of service attack.

Business Interruption – net profit or loss due to unauthorized access to computer systems, loss of PII, transmission of a computer virus or a denial of service attack.

PCI – fines, penalties and assessments incurred from card brands due to non-compliance with PCI arising from a data breach.

Comprehensive Cybersecurity Oversight from NXTsoft Just Got Better!

All TA vCISO clients are eligible for our limited warranty program. This program will reimburse you up to \$500,000 for certain types of losses resulting from certain cyber incidents / breaches if incurred during the ThreatAdvice vCISO contract term.

Coverage may include payments or reimbursements for costs like forensics, breach coaching, notification, credit monitoring, data restoration, ransom demands, loss of business income, regulatory fines & penalties, PCI fines & penalties, and defense/payment of liability claims, up to a total limit \$500,000.00 per vCISO client.

Please visit info.nxtsoft.com/tavcisowarranty for the limitations and restrictions apply.
