

# NTC K-12 Micro-Learning Projects

@nashtechcouncil

New Collaboration Opportunities

Students across the state are looking for innovative immersive learning experiences to preview the working world. Similar to virtual apprenticeships and internships, these projects offer a focus on individual projects and focused collaboration with a professional.

## Spotify Data Challenge

Students deep dive into their own streaming habits, work with a business partner to interpret the data and discover meaningful results.

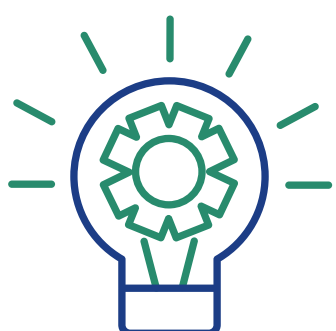

## MTSU Jobs Report Hackathon

An analysis of the Middle TN Tech Jobs report, where students explore jobs in demand, work with a sample data set, and participate in a mini-hackathon with JuiceBox.

## Tech Marketing Campaign

A marketing campaign designed by students to attract their peers to STEM & CS courses through insights gained in their jobs report research.

**WE ARE LOOKING FOR NEW INNOVATIVE PROJECTS TO CONNECT STUDENTS TO COMPANIES THROUGH MEANINGFUL WORK BASED LEARNING EXPERIENCES!**
